Experience

Software Engineer Consultant

FDM

Toronto, Canada 03/2026 – 08/2026

- Built REST APIs using Spring Boot with Spring Data JPA, Web Client, and microservices architecture, applying TDD with JUnit and Mockito
- Applied SOLID principles, design patterns, and multithreading using Java Collections and Generics for scalable, maintainable code
- Developed SPAs in React using Hooks, React Router, and Axios, integrating REST APIs and building responsive UIs
- Deployed and managed containerized applications on GCP with CI/CD pipelines, leveraging GCP logging and monitoring tools for observability
- Utilized SQL for data management including joins, subqueries, and functions; leveraged Java 8 streams and lambdas for functional data processing

Senior Software Engineer

Rogers Communications Inc

Toronto, Canada 05/2022 - 05/2025

- Developed and maintained the eView platform, a network management system overseeing 14,000+ devices, building **Node.js services** that synced live device data to SQL Server and returned formatted responses to frontend dashboards
- Built a file management system using the Chonky framework, leveraging **Node.js** for file handling workflows including uploads, storage processing, and server-side file operations, backed by a .NET layer for business logic
- Designed **Node.js API** middleware using controller and service layers to validate, transform, and route data between microservices and the frontend, keeping business logic cleanly separated from request handling
- Implemented CI/CD pipelines using Azure DevOps, GitHub Actions, and YAML, ensuring reliable deployments across dev/test/prod environments
- Optimized **SQL** Server stored procedures and collaborated with DB teams to design scalable data models for efficient cross-system data mapping
- Modernized legacy ASPX pages into React JSX components, ensuring WCAG 2.1 AA and AODA compliance

Software Developer

Resili

Toronto, Canada 06/2020 - 04/2022

- Developed responsive UIs using **Angular** and **JavaScript** to support emergency workflows for overdose response
- Performed diagnostics in **Android Studios**, meticulously testing APIs from external providers. Utilized **Postman** for streamlined testing, ensuring thorough evaluations of authentication protocol functionality.
- Assisted in prototyping chatbot workflows using **LangChain** for AI-driven response generation.
- Leveraged **Bootstrap**, **HTML5**, **CSS3**, and **JavaScript** to enhance UI consistency across platforms, ensuring compliance with accessibility and performance best practices.
- Worked in **Agile** development cycles, collaborating with multidisciplinary teams to deliver scalable features and ensure successful project execution from planning to deployment.

Software Developer Intern

XP Eats

Mississauga, Canada 09/2019 - 12/2019

- Built and maintained backend features for a high-volume food delivery platform using **Laravel (PHP)** and **MySQL**, improving performance and reliability.
- Designed and implemented an **automated survey processing system** in Laravel, streamlining data collection and reducing processing time by 40%.
- Developed a **bi-weekly membership feature** that drove a 38% increase in average order value, and created digital media content for the grocery page.
- Optimized codebase and assets, cutting **HTTP requests by 50%** on xpeats.com and enhancing site responsiveness.
- Gained hands-on experience with **eCommerce and logistics workflows**, supporting product scalability and user experience.

Skills

- Typescript | BASH | DB2 | REACT | Python | JavaScript | HTML | C/C# | z/OS | MySQL | PostgreSQL | NodeJS | Bootstrap | .NET | PHP
- GIT | JIRA | Burp Suite | FileAid | Azure | Wireshark | Unit Testing | Lambda | OOP | Visio | Cloud Computing | Kali Linux | Unix
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | English, Punjabi, Hindi – *All professional proficiency or above*

Education

Bachelor of Science,
Computer Science

University of Western Ontario

London, Canada
